

Water stop welded on

Square water stops 120 x 120 prevent the ingress of water. Integrated studs improve bonding with concrete.

WD = wall thickness

Length of tie rod: $L = WD - 2c$

Please order tie rods cut to length separately

Applications, features, properties and benefits

Square water stops 120 x 120 offer protection against ingress of water. Integrated studs improve bonding with concrete and resistance to torsional stress. Striking time to be observed.

Conical holes can be filled with mortar or a concrete plug after removal of plastic cone.

Concrete cover of 35 or 50mm when used with Cone EX.

Concrete cover of 50mm when used with MKK B 15.
