

COMAX® P - Standard types

For faster execution of reinforcement joints

Standard length 1.25 m, height of the box: 30 mm

Significant advantages for the planner:

Excellent concrete bonding owing to perforated beaded strip

Significant advantages on the building site:

COMAX® P speeds up completion of shuttering owing to tear-off cover

- no tools needed

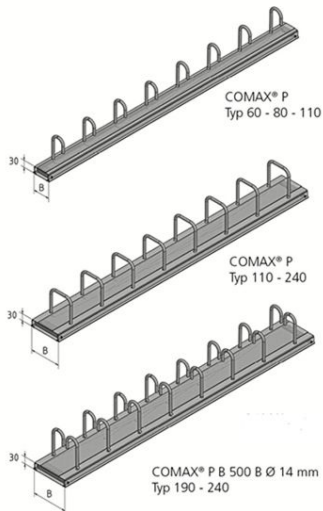

COMAX® P - KOMO certified

COMAX® P - robust and very strong

COMAX® P is highly compatible with the BETOMAX® injection system

Practically no restriction of injected material

DIN 1045-1 states that the load capacity utilization of casings must not exceed 80%

Agenda:

B = Type/strip width/element width

l = Anchoring length

b = Stirrup width

h = Stirrup height

e = Stirrup spacing

Technical data

Agenda:

B = type/sheet width/element width

l = anchorage length

b = temple width

h = hoop height

e = stirrup distance
